MUHAMAD HANDIKA MAWARDI

JUNIOR SOFTWARE DEVELOPER | WEB DEVELOPER

Tangerang, Indonesia | muh.handika.m@gmail.com | +62 89628954311 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Informatics Engineering graduate with hands-on experience developing web-based applications through academic, community-service, and independent projects. Experienced in frontend and backend development, REST API development and integration, database management, and web application development using JavaScript, PHP, Python, Laravel, and FastAPI. Experienced in implementing Natural Language Processing and machine learning methods, including TF-IDF and Support Vector Machine (SVM), in web applications.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, PHP, Python
- **Web Development:** HTML, CSS, Bootstrap, Tailwind CSS
- **Backend & API:** Laravel, Flask, FastAPI, REST API
- **Database & Data:** MySQL, SQLite, SQLAlchemy, Google Sheets
- **AI / Machine Learning:** Natural Language Processing (NLP), Text Preprocessing, TF-IDF, Support Vector Machine (SVM)
- **Tools & Platforms:** GitHub, Visual Studio Code, Laragon, XAMPP, Chrome DevTools, GDevelop 5
- **Testing & Quality:** Black-box Testing, User Acceptance Testing (UAT)

PROJECT EXPERIENCE

SIPADUKA | Web Developer | *Community Service Project*

- Developed a web-based system to support population and family data collection.
- Contributed to frontend and backend development as part of a development team.
- Integrated Laravel, Google Apps Script, Google Sheets, and Fonte API for data processing and system integration.
- Implemented a data flow from WhatsApp through Fonte API and Google Apps Script to Google Sheets, displaying processed data in the web application.
- Performed functional and integration testing while collaborating with team members to resolve technical issues.

Smart Task Manager | Web Developer & NLP Project | *Undergraduate Thesis*

- Developed a web-based task management application featuring automated task category and priority classification.
- Built a REST API using FastAPI to seamlessly connect the web application with machine learning text classification models.
- Implemented Indonesian text preprocessing, TF-IDF feature extraction, and Support Vector Machine (SVM) for task classification.

- Managed application data using SQLite and SQLAlchemy, establishing prediction endpoints for task classification.
- Executed model training, evaluation, debugging, Black-box Testing, and User Acceptance Testing (UAT).

YaumiApp | Web Developer | *Independent Project*

- Developed a web-based application designed for recording and monitoring users' daily worship activities.
- Architected and implemented frontend, backend, and database components of the application.
- Utilized PHP, HTML, CSS, JavaScript, Bootstrap, and MySQL to deliver core activity-recording features.
- Performed database management, debugging, and functional testing throughout the development lifecycle.

Educational Game Development | Game Developer | *Independent / Academic Project*

- Developed educational game projects leveraging GDevelop 5 and event-based programming.
- Designed gameplay interactions and quiz-based learning mechanics optimized for educational objectives.
- Tested gameplay functionality, refining the user interface and game interactions during development.

EDUCATION

Bachelor of Informatics Engineering (S.Kom.)

Universitas Cendekia Abditama | 2022 – 2026

- Graduated, awaiting official graduation ceremony (Yudisium completed).

LANGUAGES

- **Indonesian:** Native | **English:** Basic / Elementary
